Comments:	

- Great job!
- All ER staff needs to go through this topic as it is so relevant.
- Would like any classes on street drugs. I don't know much about them.
- This inservice was very valuable to me for my job.
- Up to date information to apply to practice.
- Now I can watch for S/S of drug abuse and know how to help (the course of tx to take)

Evaluation n=19 PEMT students

	Excellent	Good	No answer
Content was presented in a logical and organized manner	53%		47%
Speaker demonstrated current knowledge of topic	100%		
Length of program was satisfactory	94%		6%

Comment or state a fact you learned:

- You can call the poison center for more reasons than I thought. Very good presentation
- When in doubt about poisons, call poison control.
- 10 tablets of Children's Tylenol is not life-threatening
- 500 leaves of poinsettia to OD
- Very informative
- Great presentation
- It was interesting

- Iron is what is toxic in vitamins
- I learned that phone answerers are RN's not just dispatchers
- Great stories. People are crazy
- I did not know bleach was not as serious
- I really enjoyed the lecture
- Bleach is not a poison that is highly poisonous
- Very good presentation and information
- 200 mg/kg toxic dose of Tylenol in children
- Taught me a lot about poison control and all the applications it can be called for
- If you don't know, call
- Not wait for symptoms to appear before you call poison control
- Find out what Diabetes pill swallowed because one can kill
- Thank you for your time
- It's sometimes better to transport before symptoms start
- 75% of all child poison calls do not have to go to hospital
- Entertaining!
- Very funny. Confident in her instruction

Outcome – increased knowledge

Needs Assessment – shows need for education about snakebite treatment

N= 12 new ER nurses

Pretest = 40% correct answers

Post-test = 100% correct answers

1. Eastern Coral snakes cause extreme tissue destruction and shock. T or F?
2. The best way to assess severity of a rattlesnake bite is by lab tests and measuring swelling. True or False?
3. The best way to assess severity of an Eastern Coral snake bite is by lab tests and measuring swelling. True or False?

Comments from attendees:

- I didn't know the people we talk to from poison control are nurses, doctors and pharmacists. Cool!
- Very useful information
- Very helpful! Thank you for coming and talking to us!!
- Excellent information for me as an ED RN. Thank you!!
