**FPICT Poison Prevention Advocacy Internship
"Satisfaction Survey"**

July 15, 2022

N=10

Program Questions	Yes	No
Did this internship help you apply and enhance your professional knowledge and skills?	100%	
If yes, please list specific skills: <ul style="list-style-type: none"> • This internship specifically helped me with creating a professional educational piece for the public. • Presentation of information, literature review, data analysis. • I learned new routes and mechanisms of exposure, as well as about the marine environment. • Drug exposures and physiology of overdose. • This internship stretches my knowledge beyond my concentration. • Assessing Poisoning Risks and Awareness Related to Household Hazardous Chemicals. • I gained a lot of awareness about different poison incidences and ways to prevent and respond to these incidences effectively and that poisoning is the leading causes of unintentional injury death. • I learned about teamwork in public health, presenting information in plain language. • I enjoyed learning about different types of drugs and their effects. • I really had a great time learning about how the poison center works as well as get insight into the types of calls they receive. • I learned a lot about over the counter medications and the risks associated with taking them. The public perception of their safety and how these medications can even be fatal. • I learned how to do surveys, which I've never done before, interpret the results, research information. This internship really taught me a lot! 		
Was the information helpful and easy to understand?	100%	
Should the poison control center continue to offer this internship?	100%	
Did you save the Poison Help number in your phone?	100%	
Were the speakers professional and effective?	100%	
Overall, did this Internship meet your expectations?	100%	
Comments:		

- Thank you. I will be sharing the hotline number.
- I will always mention the Poison control center when appropriate and will use it in my profession.
- I will share the up and away concepts with my friends and family who are parents.
- I learned so much: medications around children, red tide, stings by jellyfish or man o war
- Enjoyed learning about the different toxins that can affect people.
- Promoting proper labeling and poison prevention strategies
- Yes, I have more knowledge in poison prevention than I had before. I was not aware of the poison center before this internship.
- I will be Informing more of my friends, coworkers, and family members about the poison control center. I will ensure that they are utilizing the PCC.
- Dr. Douge's comments, lectures and one-on-ones helped me greatly in creating my project.
- I plan on making sure everyone I know and my community has information on how to contact the poison center what services they provide.
- Poison control is as important as 911.
- It was a great experience. I learned a lot about poison control and why it is important.
